
Paladin Data Systems announces New Mexico's Ristra Project Awarded NADO's Annual Innovation Award

New Mexico Council of Governments Project built with Paladin's Panoramic awarded at NADO's Annual Training Conference in New Orleans, LA.

Poulsbo, WA - October 27, 2015

Paladin Data Systems, a leading developer and provider of software development, integration, implementation, database administration, and project management services, announced today that the New Mexico's Ristra Project (www.ristraproject.com) has won one of NADO's Annual Innovation Awards. The project was built with Paladin's Panoramic technology and launched in 2013.

The Annual Innovation Award was presented at the 2015 National Association of Development Organizations (NADO) Annual Training Conference on Monday, October 26. The annual conference provides advocacy, education, research, and training for the nation's regional development organizations. The association and its members promote regional strategies, partnerships, and solutions to strengthen the economic competitiveness and quality of life across America's local communities.

The Ristra Project that won a NADO Innovation Award features a database and portal built on Panoramic technology that allows New Mexico COGS to visualize and share information about their programs, plans, and projects. The Ristra Project web portal is designed to assist local government navigate state and federal funding programs, to track the lifecycle of projects, and to establish a lasting record of project activities—all core to the work of the Cogs.

"This is my favorite conference every year. Conference staff are professional and accommodating and attendees are friendly, engaging, and doing great things for communities around the country. It's a great conference and honor to be a part of this Award for New Mexico," Panoramic Business Development Manager, Jeff Pavey said.

Panoramic is used by state agencies and local government to track, communicate and share information about a range of projects and plans.

About Panoramic

Panoramic is designed for Program Managers who need to plan, track, evaluate, and share information about their program to project stakeholders, other agencies, and to the public. Panoramic is a web-based system helping organizations communicate the purpose, activities, locations, and accomplishments of their programs. Panoramic provides spatial integration, cross-organization collaboration, performance reporting can be specifically tailored to nearly any program.

About Paladin Data Systems Corporation

Winner of numerous prestigious awards that include Top DoD Program Award, Paladin Data Systems has developed a suite of cloud-based software products serving a wide-range of government agencies in all 50 states and 6 territories.
